2 Academic writing

Please write an article about each of the following arguments. (I want two articles not just one!)

“People are using the internet more and more, and as a result the internet is having an increasing effect on society. Discuss the beneficial and harmful effects of the net on society. Then indicate what you believe the role of internet should be and why.”

“Think of the most interesting class you have ever taken. Why did you enjoy this class so much? Use specific reasons and details to explain your answer.”

I hope that this effort will help you in your future research careers. In each of your articles, please remember the following issues.

- Your work should be a coherent article with an introduction, body, and conclusion not just a list of unrelated points!
- If your article is divided into sections and subsections then those divisions should have informative titles and be numbered in sequence.
- If you cite references, the reference list should appear at the end of your article in the order of their appearance in your article.
- Your article should cover the different aspects of the argument.
- Your article should have neither spelling nor grammar mistakes.
